URBAN ITALIAN DESIGN

“BORGO” BOLLARD POST

COD. ART. UIDT2167

Structure

Bollard post manufactured from round galvanized steel tube Ø 60 mm, featuring a decorative spherical top made of cast aluminium.
The bollard is equipped with side eyelets for optional chain installation and includes a cast aluminium hole-cover flange, designed to ensure a clean, refined and decorative finish once installed.

Finish

The galvanized steel components undergo a complete surface treatment cycle consisting of:

vapor-based degreasing pre-treatment to remove impurities;

drying phase;

application of thermosetting powder coating using an electrostatic process.

The product is then placed in a hot-air circulation oven for the polymerization process, carried out at a temperature between 180 and 200 °C, allowing the powder coating to melt and adhere evenly to the surface.
After curing, the components are left to cool naturally.

The powder coatings used are non-toxic and compliant with current regulations.
Available in RAL colours upon customer request.

Dimensions

Diameter: Ø 60 mm

Overall height: 1200 mm

Above-ground height (usable): 1000 mm

Fixing

To be embedded into the ground.
