

ESSENZIALE BENCH

Structure: Composed of two “C”-shaped supports made of 8 mm thick steel sheet. The seat consists of 4 exotic wood profiles, properly treated with an oil finish, mahogany color, section 110/120 x 45 mm, with beveled edges and corners free of sharp parts. Also available in pressure-treated Nordic pine with a natural finish.

Powder coating: The galvanized steel parts first undergo a pre-treatment process of degreasing impurities through vapor solutions, then dried and subjected to painting operations using electrostatic guns that coat the pieces with powder paint in powder form. Subsequently, the product is subjected to oven polymerization, a process that allows the powder to solidify by baking at a temperature of 180/200°C in a hot air circulation oven. The pieces coming out of the oven are cooled naturally. The powders used in the painting process are non-toxic and comply with current regulations. RAL color available upon customer's request.

Hardware and fasteners: Galvanized, compliant with UNI 3740.

Overall dimensions: 180 x 47 x 45 h cm.

Anchoring: To be fixed flush with the ground.

Delivery: Supplied as a mounting kit.

Available versions: Natural autoclave-treated pine or exotic wood with walnut stain.

Natural autoclave-treated pine

Exotic wood, walnut-stained
