

URBAN ITALIAN DESIGN

MATERA BENCH
COD. ART. UIDA402_2006

Structure:

Bench composed of two supports made of galvanized round steel tube $\text{Ø } 60 \times 2$ mm, bent into an inverted “U” shape and equipped with base plates for ground anchoring.

Seat and backrest, 200 cm in length, manufactured with oval steel tubular slats, section $40 \times 20 \times 1.5$ mm, fitted with black PE ribbed end caps.

Finish:

All galvanized steel components undergo a steam degreasing pre-treatment, followed by drying and electrostatic application of thermosetting powder coatings. The product is then polymerized in a hot-air oven at $180\text{--}200$ °C, allowing the powder coating to fully cure. Components are subsequently naturally cooled.

The powders used are non-toxic and compliant with current regulations.

RAL colours available at the customer’s choice.

Overall dimensions:

$212 \times 56 \times 76$ cm (H) – seat height: 45 cm.

Anchoring:

Flush with ground.

Supply:

Delivered as an assembly kit.
