

URBAN ITALIAN DESIGN

VENEZIA STEEL BENCH COD. ART. UIDA4167

Structure:

Bench composed of two supports made of laser-cut shaped steel sheet, thickness 60/10.

Seat and backrest manufactured from galvanized round steel tubes Ø 20 mm, thickness 15/10, fitted at the ends with black PE ribbed spherical end caps.

Finish:

All galvanized steel components undergo a steam degreasing pre-treatment, followed by drying and electrostatic application of powder coatings. The product is then polymerized in a hot-air circulation oven at 180–200 °C, allowing the coating to fully cure. Components are subsequently naturally cooled.

The powders used are non-toxic and compliant with current regulations.

RAL colours available at the customer's choice.

Fasteners:

Stainless steel.

Overall dimensions:

150 × 69 × 86 cm (H) – seat height: 45 cm.

Anchoring:

Supports pre-drilled for ground anchoring with expansion anchors.

Supply:

Delivered to the customer as an assembly kit.
